I previously sent copy of this to Cathy, at this time I am not planning to attend. I discussed this with ODEQ, they don't see the need for me or us to attend.

Wilcox is not on tribal lands and there is no tribal involvement. Is the location of some former refineries immediately north of the town of Bristow in OK.

Todd/ODQs slide presentation mentioned in this email is what they (ODEQ) presented in a public meeting early this year. They informed (1) the site was added to the NPL, (2) discussed the Superfund process of what would come ahead, (3) presented some aerial photographs and maps of the site history and what are current site uses and conditions. They also answered questions from the public. I attended with the EPA CIC Bill Little.

CONFIDENTIAL – Pre decisional

This is an FYI. I have not responded to this.

I was not planning to attend a Wilcox tribal /state agencies meeting at this time, and I don't see much tribal involvement at this site.

Plus we are in the enforcement first phase, SNLs were sent, we don't have a good faith offer yet and recipients of SNL are reviewing the particulars of what could be their involvement and if there is any applicability of petroleum exclusion prior entering in any kind of negotiations.

We are moving along in the enforcement/negotiations/legal process as required by CERCLA.
